PROFESSIONAL SUMMARY

A highly motivated and structured third-year Arabic Language student at Alexandria University, balancing humanistic academic excellence with a self-taught technical specialization in Software Engineering and Data Engineering. Possesses a strong foundational mastery of low-level and high-level programming logic, database management, and object-oriented architectures. Proven track record of rigorous self-directed learning with extensive coursework completion from globally recognized institutions. Eager to leverage technical capacities, analytical thinking, and extreme organization in a professional internship role.

EDUCATION

Faculty of Arts, Alexandria University (2023 – Present)

Bachelor of Arts, Major: Arabic Language

- Current Standing: Year 3 completed.
- Developed exceptional analytical skills, structured textual processing capabilities, and advanced linguistic logic.

KEY PROJECTS

Driving Vehicle License Department (DVLD) Management System (In Progress) — *Self-Directed Practical Project*

- Designing and implementing a comprehensive business logic application focused on driving license management as part of an advanced self-study software engineering roadmap.
- Architecting relational database structures using SQL and applying C# and Object-Oriented Programming (OOP) principles to handle application workflows and business rules.

PROFESSIONAL CERTIFICATIONS & TRAINING

- **Digital Egypt Pioneers Initiative (DEPI) - Data Engineering Track**
 - Intensive professional training program focusing on core Data Engineering concepts, advanced Python programming, and robust database management.
- **Technical Reading Program (Self-Study)**
 - Actively studying "Mastering Data Sets with Python," focusing on Big Data processing architectures, MapReduce paradigms, and scalable data handling techniques.
- **CS50: Introduction to Computer Science (Harvard University)**
 - Algorithms, data structures, resource management, and software engineering.
- **Online Software Engineering Track (Courses 1 to 18)**
 - Intensive foundational online track in software development, algorithmic logic, and deep database structures (Abu-Hadhoud Khariata Platform).
- **Python Programming Basics (ITI - Mahara-Tech)**
 - Certified mastery of structural components, functions, data types, and core automation syntax.
- **Introduction to Python & AI (Edraak Platform)**
 - Foundations in programming blocks, OOP, and machine learning paradigms.

TECHNICAL & PERSONAL SKILLS

- **Programming Languages:** C++, C#, SQL, Python

- **Data Engineering & Databases:** Relational Database Design, DBMS, SQL Architecture, Big Data Processing (MapReduce Fundamentals)
- **Methodologies:** OOP, Data Structures, Algorithmic Logic, Git
- **Soft Skills:** Extreme Organization, Self-Directed Learning, Time Management
- **Languages:** Arabic (Native), English (Intermediate B1)
